COVID-19 REOPENING & SAFETY POLICIES

As we anticipate the reopening of our country, we are committed to doing our part in facilitating a safe environment for our employees and customers. Our goal is to service our customers while proactively following the Centers for Disease Control (CDC) guidance regarding the Coronavirus (COVID-19).

We are open for deliveries and customer pickups at our 18 Clinton Drive, Hollis, NH location. Customer pickups must be previously arranged by calling the office. Prepayment will be required to limit the time a customer needs to be in our office. All patrons visiting our locations are to wear a mask and respect a 6-foot social distancing. We will clean and sanitize common areas before and after each appointment to ensure adequate sanitation.

If you are planning an event, we understand the concerns you may have for the health of you and your guests. We have set forth extra precautionary measures to maintain business and ensure the safety and well being of our customers, employees and partners.

Here are some additional steps Christian Party Rental is taking:

- We are closely following the guidelines from the CDC as well as our local U.S. health authorities to provide our employees with updated guidelines and direction on healthy work habits.
- Employees are asked to NOT report to work if they are feeling ill.
- PPE such as masks are being used as well as extra sanitation routines.
- We have provided sanitation goods throughout our workspace and warehouse.
- All equipment is being sanitized and handled with precaution before leaving the warehouse to avoid any potential spread of the virus.
- All delivery, site survey personnel and operations teams are required to wear appropriate PPE.

As always, health and safety are of the utmost concern in our business. We are complying with the CDC protocols and continue to practice safe and sanitary measures with our products. Below is an overview of some of our cleaning procedures:

Warehouse Equipment: All equipment is wiped down/sprayed with an all-purpose cleaner provided by TEECO and then air dried for maximum sanitation. All equipment is cleaned, dried and stored with clean and sanitary practices.

Tents: Our in-house industrial tent washing machine sterilizes tent vinyl with water heated between 95-100 degrees F combined with a sanitizing agent. Tents are cleaned, air dried and stored with clean and sanitary practices.

Linens: Linens are subleased, and our vendors are responsible for processing them with a strict wash cycle length and cleaning solution standard to meet industry recommendations in providing clean and sanitary linens. All linens are cleaned, pressed, dried and packaged and stored with clean and sanitary practices.

As we respond to the evolving health situation, we will evaluate additional measures as recommended. We are committed to working with you during this difficult time. Thank you for your support and business. Be safe and be healthy!
